

Installation of InterCafe 2004 Client

1 Finding the Installation File

1. Go to the Computer which you are using as Server in your network.
2. Choose the Folder in which you have saved the installation file (`Client.Setup.exe`).
3. If you cannot find the file, make a right click on *My Computer* and then on *Search...*
4. Choose → *Files and Folders* in the menu on the left side.
5. Enter `ClientSetup.exe` as *Part of File Name or File Name*.
6. If the file can be found it will be shown in the search window.

2 Installation of InterCafe 2004 Client

1. Double click on the file `ClientSetup.exe` to start the installation.
2. After the Start the Windows-Installer might have to be configured. Please wait until you see the Welcome Window of the Setup. Confirm with *Next*.
3. **Read the license agreements.** You can only click on *I am accepting the license agreements* and then on *Next* if you agree with the license agreements. **If you do not agree you need to abort the setup at this point!**
4. Confirm the User-Information with *Next*.
5. Confirm the destination folder with *Next* and start the installation with *Next*.
6. The installation might take a while. Please wait until it is finished.
7. Click on *Finish* to close the installation.

You can now find InterCafe 2004 Client in your Start Menu in *Programs* → *InterCafe Client* → *Client Config* and *Start Client*. Before you start the Client Software first start the *Client Config* to configure the Client as described in the Manual for InterCafe 2004.
